

FLEXIBLE FLUME

By Cosio Industries Ltd

ATTACH TO CONCRETE OR PLASTIC CULVERT PIPES
Cosio Flexible Flume is easy to install and helps to prevent embankment erosion by diverting run-off water

Available in custom made sizes from 200mm - 900mm

- Constructed from a durable Polytarp material which is available in Green, Blue, and White in colour.
- Webbing loops every 2m for securing flume
- Custom made to suit application.
- Easy installation
- Can be used for temporary down pipes on new building sites
- Can be used to channel water away from drain pipes or concrete culverts
- Prevents erosion to embankments by channelling water away from discharge points.
- Unless stated Cosio Culvert flexible flumes include 1 x Stainless Steel pipe clamp cut to length to suit flume size.
