

AQUAFELT

Capillary matting

Aquafelt is a polyester felt which absorbs water and helps to feed plants evenly.

Typical installation

A waterproof membrane must be placed underneath Aquafelt to ensure no water is wasted. Irrigation lines should be placed at the highest side of the bench and should be connected to a timer to ensure overwatering is minimised. A maximum fall of 50mm over 1m is recommended to help the capillary process and avoid stagnant water. To help keep the fabric clean Geocil weedmat or Ultrapro woven weedmat can be placed over the Aquafelt.

Technical specs

- Roll size - 1.05m x 25m, 2.1m x 25m
- Colour - White
- Material - Polyester 460gsm with spunbond backing

Applications

- Greenhouse tables / benches
- Living walls

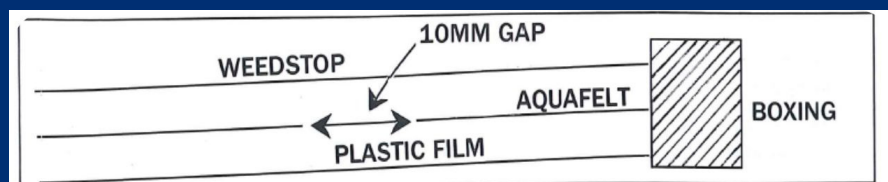

DIAGRAM #1: Capillary Watering on sloping sites. Fall should not be more than 50mm/1m.
