HAILNET

Heavy duty knitted Hail netting

Hailnet is designed to help protect plants from hail, wind and bird damage.

Hailnet is a lightweight solution for overhead canopies. Hailnet is designed for overhead hail, wind & bird protection and will also offer light shading of around 15-20%.

Hailnet comes with reinforced centres & edges and button hole eyelets on the sides to assist with installation.

Use shackles or cable clip lock to attach hailnet to wire or cables.

Hailnet can be cut to length, or manufactured to custom widths & lengths on an indent basis.

Applications

- Crop & plant protection
- Overhead bird netting
- Light shading
- Wind & hail protection
