

# MULCH & CLOCHE FILM

## Mulch film

Mulch film is typically black and used for one season to help increase the soil temperature and control weed growth. Mulch film is available in custom widths and lengths.

### Stock sizes available

- 750mm x 500m x 30um
- 900mm x 500m x 30um
- 1200mm x 500m x 30um
- 1800mm x 500m x 30um

## Cloche film

Cloche film is a clear / Natural plastic which is normally used for one season over hoops or cloche frames. Cloche film helps to create a microclimate in the colder months to increase crop growth. Cloche film is available in custom widths and lengths.

### Stock sizes available

- 1200mm x 500m x 50um UV (sws)
- 1600mm x 500m x 50um UV (sws)
- 2000mm x 500m x 50um UV (centre fold)
