

TREE TIE WEBBING

Handy tree tie webbing for supporting trees is available in long life Polywebbing or biodegradable Jutewebbing.

Poly webbing

- 50mm x 5m, 10m, 25m, 100m
- Black
- Lifespan 3+ years

Polywebbing is a woven PP tree tie suitable for supporting trees. Polywebbing is UV stabilised so will last longer than Jute webbing. Polywebbing is not biodegradable

Jute webbing

- 50mm x 5m, 10m, 33m
- Beige - Natural jute
- Lifespan - 6-12 months depending on application & climate

Jute webbing is a natural woven tree tie which is soft on trees and can be used to help prevent wind damage. Jute webbing is made from 100% Jute fibre which is biodegradable
