WINDBREAK KIWI

Heavy knitted windbreak

Ultrapro Windbreak Kiwi is a premium heavy knitted white windbreak which is widely used in the horticultural industry. Ideal for Kiwifruit orchards.

Windbreak Kiwi is used extensively in the kiwifruit industry to enhance cane growth, increase production and can help to increase temperatures within the orchard. Our in-house sewing department can sew hem & drawcords on the sides & centre if required, cut to length and join to your height requirements. We recommend threading wire through the button hole eyelets OR using hem & drawcord for professional installations.

Applications

- Kiwifruit orchards
- Avocado orchards
- Boundary fences
