

BIDIM

Nonwoven geotextile

Bidim is a nonwoven geotextile designed to be used in a multitude of engineering applications.

Bidim nonwoven geotextile can be used in; Filtration, Drainage, Separation & Underliner applications. Bidim nonwoven geotextile is manufactured from either Polyester OR Polypropylene staple fibre, then needlepunched for strength. Bidim can be secured to the ground using steel staples, plastic pins, sand bags or rocks. It is recommended that Bidim is overlapped a minimum of 500mm between rolls.

Roll sizes / Grades

- A14 - 2m x 50m, 4m x 50m, 4m x 100m, 6m x 250m
 - A19 - 2m x 50m, 4m x 50m, 4m x 100m, 6m x 200m
 - A29 - 2m x 50m, 4m x 50m, 4m x 100m, 6m x 150m
 - A39 - 4m x 100m, 6m x 125m
-
- Colour - Grey / White
 - Cut to length service does not apply to 6m wide & A39 grade
 - Bidim must not be left exposed to sunlight for extended periods.
 - See our Technical brochure for detailed information.

Applications

- Drainage
- Roothing
- Underliner
- Separation fabric
- Filtration
