

PEA & BEAN NETTING

Extruded flower & bean netting

Pea & Bean netting is a low cost, lightweight extruded plastic netting for climbing plants.

Pea & Bean netting can be used vertically to support crops such as sweet peas, runner beans or can be used horizontally to support long stemmed flowers or broad beans.

Installation guidelines

Simply roll out and carefully cut to the length required. Pea & Bean netting can be fixed to existing timber fences or can be fixed to strong stakes such as bamboo. Run rope or wire along the top & bottom edges. Fix Pea & Bean netting to the wire using windbreak clips or cable ties.

Technical specs

- Roll size - 2m x 500m
- Mesh size - 150mm x 150mm
- Colour - Green
- Material - UV Stabilised, Extruded HDPE
