

VISUAL BARRIER NET

Building site fence scrim

Visual barrier net can help to reduce visibility into construction sites, events and other areas where restricted sight is required.

Applications

- Temporary fences
- Construction sites
- Public events
- Dust screening
- Wind reduction
- Use with Logonet printed banners

Advantages

- UV stabilised
- Button hole eyelets
- Heavy duty
- Economical fence scrim

Technical specs

- Roll width - 1.83m x 50m
- Colour - Black
- Shade - 85-90%
- Lifespan - Can last up to 5 years depending on site conditions
- Wind porosity approximately 15-20%

Use Cosio Polyclips OR cable ties for a quick, simple installation, spaced apart 500mm. For higher wind areas we recommend 300mm between clips. Cable ties are 4.8mm x 300mm. For semi permanent installations we can sew a hem & rope or drawcord on the edges or place eyelets on edges.
