

# COVERTEX

Protective shade cloth silage cover

- No more tyre soup water
- Reduces habitat for rats & wasps
- Reduces bird damage to silage covers
- Pre-order now as covers are made to order

## Get rid of your tyres!

Use Covertex shade cloth to protect your traditional plastic silage covers, helping to reduce pest damage and reducing the need for tyre weights.

### Panel sizes - made to order

- 8m x 12m
- 8m x 16m
- 12m x 10m
- 12m x 14m
- 12m x 16m
- 12m x 18m

### Want a one-piece cover?

We manufacture covers here in NZ so large one piece covers are not a problem.

We can also provide smaller panels for the face once feeding out starts.

Let us know the size you require and we can fabricate to suit.

### Shade cloth gravel sausages

Ask us about our shade cloth sausages as an alternative to tyres. Simply fill with gravel to a weight of between 15 - 20kg. Shade cloth bags are recyclable and reduce the need for tyres used as weights.

### Where to buy?

Our covers can be purchased directly from the factory or can be charged on your farm account through all major farm supplies stores.
