CANOPY BIRDNET

Overhead crop netting

Commercial grade knitted canopy birdnet is manufactured for long term use on overhead structures to help protect plants from bird & pest damage.

Canopy birdnet has a 16mm mesh size and is designed to be fixed to overhead cables for covering large areas of crops where bird & pest protection is required. Canopy birdnet will also give some protection from wind. Use cosio CFlex shackles, or cable clip lock to attach birdnet to wire or cables. When cutting birdnet to length allow an extra 25-30% this will ensure the birdnet is the correct length when fixed at the stated width.
