

PANDA FILM

Black & White reflective plastic

Panda film is a black & white co-extruded polyethylene, suitable for greenhouse flooring & hydroponic gullies.

Panda film is co-extruded and made from high quality virgin resins making it strong & durable. Panda film is commonly used in greenhouses for flooring in combination with Ultra-mat which helps to give a hardwearing, waterproof, durable flooring. Panda films bright white colour gives better reflectivity for increased plant growth. Some insects are also discouraged by the reflected light. Panda film is also commonly used to line hydroponic gullies and greenhouse / hot house walls.

Applications

- Greenhouse flooring
- Hydroponic gullies
- Hot house wall lining

Technical specs

- Roll size - 600mm x 400m 150um
- Roll size - 2m x 50m, 4m x 50m & 250m bulk rolls
- Colour - White / Black
- Material - 150 micron, UV Stabilised, Co-extruded LDPE

Other sizes can be manufactured on an indent basis
