

TREE TIE WEBBING

Durable tree tie webbing for supporting trees and reducing damage from wind. Available in UV treated Polypropylene for long life outdoors or natural Jute for a compostable option.

Poly webbing

- 50mm x 5m, 10m, 25m, 100m
- Black
- Lifespan 3+ years

Polywebbing is a woven PP tree tie suitable for supporting trees. Polywebbing is UV treated and designed for long life outdoor applications.

Jute webbing

- 50mm x 5m, 10m, 33m
- Beige - Natural jute
- Lifespan - 6-12 months depending on application & climate

Jute webbing is a natural fibre woven tree tie which is soft on trees, but durable. Jute webbing is made from 100% Jute fibre which is biodegradable and contains no added chemicals.

May contain oils from production equipment.
Blue colour stripe contains coloured dye.
