

BEAN & FLOWER NETTING

UV-stabilised support netting for climbing plants and long stemmed flowers.

Strong, UV-stabilised netting that provides reliable support for climbing vegetables and flowering plants, promoting healthier growth and easier harvesting.

Support healthy plant growth with strong, lightweight Flower & Bean Netting. Ideal for climbing beans, peas, cucumbers, tomatoes and flowering plants, it provides reliable support while encouraging straighter growth and improved air circulation. UV-stabilised for outdoor use, it is easy to install and suitable for home gardens, commercial growers and landscaping applications.
