

# SILAGE SHIELD

SILAGE COVER PROTECTION NET

- No more tyre soup water
- Reduces habitat for rats & wasps
- Reduces bird damage to silage covers
- Pre-order now as covers are made to order

## Get rid of your tyres!

Use SILAGE SHIELD to protect your traditional plastic silage covers, helping to reduce pest damage and reducing the need for tyre weights.

### Panel sizes - made to order

8m x 12m | 8m x 14m | 8m x 16m

12m x 10m | 12m x 14m | 12m x 16m | 12m x 18m

### Want a one-piece cover?

We manufacture covers here in NZ so large one piece covers are not a problem.

We can also provide smaller panels for the face once feeding out starts.

Let us know the size you require and we can fabricate to suit.

quality products and exceptional service

## Gravel Bags

COSIO Gravel Bags are an alternative to tyres. Simply fill with gravel or Sand to a weight of approximately 15kg. Gravel bags are recyclable and reduce the need for tyres used as weights.

### Specifications

- Size unfilled - 25cm x 100cm
- UV treated HDPE
- Green colour
- Approximate filled weight 15kg

### Features

- Permeable material – will not hold water
- User-friendly grab handles – two built in handles allow for easy moving and stacking
- A convenient built-in draw string is included in each bag for quick easy tying (a back-up cable tie could also be added)

Gravel bags should be placed around the perimeter and on all overlaps.  
Overlap SILAGE SHIELD or GEOSMART by at least 0.5m
