CANOPY BIRDNET

Overhead crop netting

Commercial-grade knitted birdnet designed for long-term use on overhead structures to help protect crops and plants from bird and pest damage.

Canopy Birdnet features a 16mm mesh and is designed for installation over large crop areas using overhead cables, providing protection from birds and pests, with some wind protection. Secure using Cosio CFlex shackles or cable clip locks. When cutting to length, allow an additional 25% to ensure the netting fits correctly when installed at the stated width.

Applications

- Crop & plant protection
- Overhead bird netting
