# SILAGE SHIELD

## SILAGE COVER PROTECTION NET

- Eliminates dirty water collecting in tyres
- Reduces habitat for rats & wasps
- Reduces bird damage to silage covers
- 7 year pro rata UV warranty
- Heavy duty knitted HDPE

## Get rid of your tyres!

**Use SILAGE SHIELD to protect your traditional plastic silage covers, reduce pest damage and the need for tyre weights**

# Gravel Bags

Gravel bags are recyclable and provide a practical alternative to using tyres as weights. Simply fill with gravel or sand to a weight of approximately 15kg.

**Specifications**

- Size unfilled - 25cm x 100cm
- UV treated HDPE
- Green colour
- Approximate filled weight 15kg

**Features**

Permeable material – will not hold water
User-friendly grab handles – three integrated handles allow for easy moving and stacking
A convenient  built-in draw string is included in each bag for quick and easy tying (a backup cable tie could also be added)

Gravel bags should be placed around the perimeter and on all overlaps.
Ensure adjacent SILAGE SHIELD or GEOCOVER panels overlap by at least 0.5 m
